Goals	To create a viable Product in Atlassian Market Place	
	To learn Scrum framework by "doing"	
Meeting norms	Write a meeting protocol every meeting	
	Do not be late (not >2 minutes)	
	Communicate if you cannot attend	
	5 minute Smalltalk/Warm-Up	
Working norms	Do not commit anything that is not working and/or badly documented	
	Commit message has to be short and clear	
	Work division via issue assignment	
	Release candidate has to be ready before the team meeting	
Coordination norms	Organize work on current PDF deliverables in Google Drive folders and the code on GitHub	
	Put labels and story points on issues	
	Thursday meeting starts with retrospective of the previous sprint and ends with a defined plan for the next sprint	
	Have two internal weekly meetings (Thursday + flexible decided upon Doodle)	
Communication norms	Discord for voice and Telegram for written communication	
	Open communication during daily/weekly	https://happy-amos.appspot.com - 2 per week
Consideration norms	Polls for decision making (majority rule)	
	On disagreement, make a second poll	
	Story points decision upon planning poker (discuss on disagreements and play again)	
Cont. improvement norms	Kanban board on github for progress tracking	
	Write standup emails at least twice per week to inform others about encountered problems and your upcoming tasks	
Rewards	Play a round of scribbl	
Sanctions	Minor failure: Punishment Jar --> Financing next "Team-Event"	
	Major failure: Punishment Issue -> issue from the board chosen by the rest of the team	
	Severity of penalties is decided by a poll within the team

Product Vision	Project Mission
<p>Going agile is getting more and more popular with companies and teams. It puts people first and promotes velocity as well as adaptability to changes in the process. Though scaling agile beyond single teams and projects also adds new challenges to tackle. Coordinating teams, managing skills and budget are some of the biggest challenges when scaling agile, as scaling beyond single teams and projects adds complexity.</p> <p>By unifying coordination and communication through our “Agile Transformation”-tool we want to enable any company to be able to scale agile. To help make existing processes and projects agile by using SCRUM we will offer our product as a plugin in Jira. Our product consists of three parts: a capacity planner, a skill database and a budget planner.</p> <p>Our capacity planner will leverage a company to a more efficient resource planning by offering a single tool for communication between teams. This tool enables transparency between teams by visualizing, consolidating and standardizing planning information throughout the company. It also benefits teams as the transparent planning process avoids both work overload as well as idle times. Further, it will make sprints more time efficient by optimizing coordination.</p> <p>Our skill database will aggregate the employees skills inside a single database. It enables discovery of unused efficiency by making unknown employee skills accessible to be discovered. Furthermore, decentralized communication can be avoided by centralizing the knowledge in one database.</p> <p>Lastly, our budget planner enables reallocation of unused budgets by giving an overview of the budget distribution inside a company. The overview will help finding high priority projects or products which may not be implemented due to insufficient budgets as well as low priority projects and products which can be postponed.</p>	<p>Our project mission is to develop the calendar feature as envisioned by the business partner so the users can organize in teams and manage/assign tasks through the use of requests.</p> <p>Teams assigned to tasks after accepting a request are shown in a calendar overview that utilizes bar-elements and colors to display the exact intervals and available time windows so the user can more effectively allocate resources and structure timelines.</p> <p>The user interface is strongly bound to the Atlassian design guide and uses the native Atlassian design objects whenever possible.</p> <p>Team and member entities contain the required information so the user is enabled to make well informed decisions.</p>

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
7	Enable creation of a request	Additional general settings	Create screen of general settings page (#55)	5	39			196
			Implement functionality to the buttons in Request Overview (#66)	8				
		Set up DB	Create Data Dictionary of objects in our database (#65)	5				
			Implement the relationship between data tables (#67)	8				
		Finish pages	Change current location of project settings (#68)	5				
		First Tests	Create first JUnit test (#69)	8				
8	Add general settings		Add issue type Request (#64)	5	28			157
		custom general settings	Define basic workflow for the Agile Platform (#73)	8				
			Add custom field Requested Team (#62)	5				
		Request Overview	Implement sortable table in Request Overview (#71)	5				
		Create Request	Implement functionality of the "Create Request" Button (#72)	5				
9	Add project settings	Test	Create a Test for the Create Request Screen	8	26			129
			Create a Test for the Request Overview Tab	8				
		Project Settings	Implement "enable plugin" in project settings	5				
			Implement "validate the requirements" in the project settings	5				
10	Team Management	Project Settings	Implement "repair" in the project settings	8	35			103
			Add team management screen	3				
		Team Management	Implement "create a team"	8				
			Implement "edit a team"	8				
			Define access rights for each user	8				
11	User Management	Main page	Implement request status in the calendar	8	32			68
			Implement functionality of the "Manage Teams" Button	8				
			Implement functionality of the "Add Team Members" Button	8				
		User management	Implement user roles	8				
12	Refactoring	Complete product	Finish Main Page	5	28			36
			Finish Project Settings	5				
			Finish General Settings	5				
			Finish Team Management	5				
				8				
13	Testing	Final Test	Test all features before final release	8	8			8

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
14	Final Release							

Sprint	Status	Source	Impediment	Resolution
1	Resolved	Team	Sprint Last Minute Photo-finish	Have additional meetings earlier, have polls specifically early.
2	Resolved	Licencing	Copyright licenses / List of Materials	Atlassian licences required + Contact Mr. Riehle and the Industry Partners
2	Resolved	Team	Everyone published on the main branch	Create feature branches; Create Merge requests; Main + dev + feature branches from dev. Person assigned to issue creates the feature branch. Update dev/main branch.
2	Resolved	Team	COACH email late	Send emails earlier.
2	Resolved	Team	Whole team doesn't always need to be in one place	More splitting up next sprints.
2	Resolved	Team	Camera Request	Meetings where everyone is together.
2	Resolved	Team	Last Hour Photo-finish	Try to improve more
2	Resolved	Team	Task responsibility was defined very late	Pick tasks right after the team meeting
2	In-work	Industry Partner	Unclearness / slowness of industry partner interactions	Weekly meeting with the industry partners -> On Demand meetings + promise to respond more quickly
3	In-work	Team	Uncertainty as to what the industry partner wants	US, more interactions with the Industry partners, trust the process
3	Resolved	Team	Gaps in knowledge between team members	- Proper documentation
4	Resolved	PO	Issue creation quite hard in terms of estimated size.	Ask SD or SM for help. SD if you think a task is too big, ask PO / other SD or SM for help.
4	In-work	Team	Unclear Atlassian documentation !!!	Own Projects Documentation and own Project Code helps with that.
4	In-work	Team	Unsurance about current developement flow. Import of external ressources not easily doable.	- Stefan found a possible solution for this and requested more help from other SDs on the matter.
4	Resolved	Scrum Master	People going rogue during the team meeting	- Consider reevaluating the team contract. How do you as a team feel about people going rogue mid meeting? -> Communication
5	Created	Team	SDs that prefer backend work would like tasks.	
5	Created	SDs	Undefined User Flow - How the user uses the application. Flow chart requested.	
5	In-work	Release manager	Commits on the same day	Only commits by the day before the teammeeting. 23.59
5	In-work	Release manager	Release manager missing - noone else had a clue.	Make sure someone else is able to do a release.
5	In-work	Team	How to deal with bonus time during holidays	Prof. Riehle provided some info on this.

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	Can be demoed	Feature has been tagged as a release candidate	Feature and Sprint Release DoD is fulfilled
	Fully tested with the unit test	All merge conflicts have been resolved and all targeted branches were merged	Fulfilled requirements for putting the plugin on the Atlassian Marketplace
	Code well structured and formatted (hold to code conventions)	Integration of all features has been tested	Developer documentation is finished
	Clear explanation of code		User Guide is finished
	No syntax/runtime errors		Code is integrated with master branch
	Codes are peerly reviewed		
	Communicate issues by leaving comments on github
