Goals	To create a viable Product in Atlassian Market Place	
	To learn Scrum framework by "doing"	
Meeting norms	Write a meeting protocol every meeting	
	Do not be late (not >2 minutes)	
	Communicate if you cannot attend	
	5 minute Smalltalk/Warm-Up	
Working norms	Do not commit anything that is not working and/or badly documented	
	Commit message has to be short and clear	
	Work division via issue assignment	
	Release candidate has to be ready before the team meeting	
	Coding Sprint ends Wednesday 23:59 - No Commits / Kanban movement after that deadline.	
Coordination norms	Organize work on current PDF deliverables in Google Drive folders and the code on GitHub	
	Put labels and story points on issues	
	Thursday meeting starts with retrospective of the previous sprint and ends with a defined plan for the next sprint	
	Have two internal weekly meetings (Thursday + flexible decided upon Doodle)	
Communication norms	Discord for voice and Telegram for written communication	
	Open communication during daily/weekly	https://happy-amos.appspot.com - 2 per week
Consideration norms	Polls for decision making (majority rule)	
	On disagreement, make a second poll	
	Story points decision upon planning poker (discuss on disagreements and play again)	
Cont. improvement norms	Kanban board on github for progress tracking	
	Write standup emails at least twice per week to inform others about encountered problems and your upcoming tasks	
Rewards	Play a round of scribbl	
Sanctions	Minor failure: Punishment Jar --> Financing next "Team-Event"	
	Major failure: Punishment Issue -> issue from the board chosen by the rest of the team	
	Severity of penalties is decided by a poll within the team

Product Vision	Project Mission
<p>Going agile is getting more and more popular with companies and teams. It puts people first and promotes velocity as well as adaptability to changes in the process. Though scaling agile beyond single teams and projects also adds new challenges to tackle. Coordinating teams, managing skills and budget are some of the biggest challenges when scaling agile, as scaling beyond single teams and projects adds complexity.</p> <p>By unifying coordination and communication through our “Agile Transformation”-tool we want to enable any company to be able to scale agile. To help make existing processes and projects agile by using SCRUM we will offer our product as a plugin in Jira. Our product consists of three parts: a capacity planner, a skill database and a budget planner.</p> <p>Our capacity planner will leverage a company to a more efficient resource planning by offering a single tool for communication between teams. This tool enables transparency between teams by visualizing, consolidating and standardizing planning information throughout the company. It also benefits teams as the transparent planning process avoids both work overload as well as idle times. Further, it will make sprints more time efficient by optimizing coordination.</p> <p>Our skill database will aggregate the employees skills inside a single database. It enables discovery of unused efficiency by making unknown employee skills accessible to be discovered. Furthermore, decentralized communication can be avoided by centralizing the knowledge in one database.</p> <p>Lastly, our budget planner enables reallocation of unused budgets by giving an overview of the budget distribution inside a company. The overview will help finding high priority projects or products which may not be implemented due to insufficient budgets as well as low priority projects and products which can be postponed.</p>	<p>Our project mission is to develop the calendar feature as envisioned by the business partner so the users can organize in teams and manage/assign tasks through the use of requests.</p> <p>Teams assigned to tasks after accepting a request are shown in a calendar overview that utilizes bar-elements and colors to display the exact intervals and available time windows so the user can more effectively allocate resources and structure timelines.</p> <p>The user interface is strongly bound to the Atlassian design guide and uses the native Atlassian design objects whenever possible.</p> <p>Team and member entities contain the required information so the user is enabled to make well informed decisions.</p>

Term	Definition
Users	Every user using the plugin (e.g. product owner, scrum master, team member, etc.)
Issue	Any work item inside jira (also called request, ticket, task)
Epics	Body of work that can be broken down into specific tasks (called user stories)
Stories	Short requirements or requests written from the perspective of an end user
Initiatives	Collections of epics
Request	An issue type in JIRA to request a capacity

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
0								241
1	Team Setup	agree on team settings	no deployable product increment, only organizational tasks					241

			Implement Assignee button in Request Overview (#99)	3		not finished		
			Implement More button in Request Overview (#98)	3		not finished		
			Create manual Frontend tests (#69)	3		1		
			Extract requests of current assignee (#82)	5		5		
			Create custom fields in general settings (#62)	5		5		
			Implement JQL search in Request Overview (#66)	8		5		
			Implement Project button in Request Overview tab (#94)	3		3		
			Upgrade from Jira Core to Jira Software (#108)	3		1		
			Implement sortable table in Request Overview (#71)	3		2		
			Implement More button in Request Overview (#98)	3		5		

[illegible]

Sprint	Status	Source	Impediment	Resolution
1	Resolved	Team	Sprint Last Minute Photo-finish	Have additional meetings earlier, have polls specifically early.
2	Resolved	Licencing	Copyright licenses / List of Materials	Atlassian licences required + Contact Mr. Riehle and the Industry Partners
2	Resolved	Team	Everyone published on the main branch	Create feature branches; Create Merge requests; Main + dev + feature branches from dev. Person assigned to issue creates the feature branch. Update dev/main branch.
2	Resolved	Team	COACH email late	Send emails earlier.
2	Resolved	Team	Whole team doesn't always need to be in one place	More splitting up next sprints.
2	Resolved	Team	Camera Request	Meetings where everyone is together.
2	Resolved	Team	Last Hour Photo-finish	Try to improve more
2	Resolved	Team	Task responsibility was defined very late	Pick tasks right after the team meeting
2	Resolved	Industry Partner	Unclearness / slowness of industry partner interactions	Weekly meeting with the industry partners -> On Demand meetings + promise to respond more quickly
3	Resolved	Team	Uncertainty as to what the industry partner wants	US, more interactions with the Industry partners, trust the process
3	Resolved	Team	Gaps in knowledge between team members	- Proper documentation
4	Resolved	PO	Issue creation quite hard in terms of estimated size.	Ask SD or SM for help. SD if you think a task is too big, ask PO / other SD or SM for help.
4	Unsolvable	Team	Unclear Atlassian documentation !!!!	Own Projects Documentation and own Project Code helps with that.
4	Resolved	Team	Uncertainty about current development flow. Import of external resources not easily doable.	- Stefan found a possible solution for this and requested more help from other SDs on the matter. Needs to be prioritized! Will be first action in this sprint [08].
4	Resolved	Scrum Master	People going rogue during the team meeting	- Consider reevaluating the team contract. How do you as a team feel about people going rogue mid meeting? -> Communication
5	Resolved	Team	SDs that prefer backend work would like tasks.	User stories involving backend have been created.
5	Resolved	SDs	Undefined User Flow - How the user uses the application. Flow chart requested.	- Team discussed the topic and will proceed from that point on and ask the industry partner about it.
5	Resolved	Release manager	Commits on the same day	Only commits by the day before the teammeeting. 23.59
5	Resolved	Release manager	Release manager missing - no one else had a clue.	Make sure someone else is able to do a release.
5	Resolved	Team	How to deal with bonus time during holidays	Prof. Riehle provided some info on this.
6	Resolved	PO	Kanban board not updated in time	Make sure to move items on kanban board until. 23.59
6	Resolved	Team	Irregular Work was not reviewed enough	Assign reviewers to the Kanban Cards
7	Resolved	Team	Not everyone was on the same page on some alternative ways to approach a goal	Communication? Ask SM for help?
8	Resolved	PO	US are dragged on for more than one sprint - Is the scope of the features too big?	
8	Resolved	SDs	Inconsistency between feature branches and dev branch	Unneeded branches are being deleted.
8	Resolved	SDs	Jira Documentation Book book is outdated! (Book from 2016)	Verify informations via Google. (Atlassian Docs / Forums)
8	Resolved	SDs	Merge without review on second Computer	-> Google is not helpful :(
8	Resolved	Team	Frustration created by "Blocker Impediment", Miscommunication	all merges are being reviewed.
8	Resolved	Team	Points in the Acceptance Criteria have been overlooked. They have been specified but were not implemented.	Attend additional monday meeting?
10	Resolved	SDs	Balance between overspecifying and underspecifying the Acceptance Criteria is hard to find.	
10	Resolved	PO	High priority tasks, did not get the priority that they deserved in PO eyes	Gaining more experience and learning from one-another
11	Resolved	PO	Having to sit in front of the computer for multiple hours can be tiring; Zoom-fatigue; 4 hours timeslot for AMOS and then other Zoom lectures.	SDs keep an eye out for possible difficulties and factor them in when estimating the size.
11	Created	Team	Unhappiness about the course / development of the lecture; Unhappiness about the structure of the course. [1]	

Sprint	Status	Source	Impediment	Resolution
11	Created	Team	<p>Unhappyness about the overall progress; Lot of time lost because no specialist is there. "We want to code not only to read"; "Student bubble" not used to real-work-environment used to straightforward projects.</p> <p>No one holding your hand at least once a week. Different expectations regarding the industry partner. Industry partner was unexpectedly positive as to the progress of the prototype.</p>	
11	In-work	Team	<p>Knowledge gap between SDs leads to different dev speed. Curse of knowledge. If you happen to know something you project that knowledge on others and expect it from them. And you might get angry if others do not know it.</p>	<p>Your Velocity Chart better represents the actual "amount of work that can be done by the team in one sprint". The Dinosaur Jira puts a lot of extra strain on the SDs keep that in mind. One way to improve that would be internal teaching meetings or pair or mob programming where the more experienced SDs get together with the inexperienced SDs so that both can improve. The experienced ones in adjusting their expectations to the actual speed of the team and the inexperienced ones in learning from the experienced ones.</p>
11	Resolved	SD	Some people have been sick and couldn't do any work	No worries. We all wish you a speedy recovery!
12	Resolved	SD	Worry that the prototype is not working on every system	Everyone will try to run the dev branch on their machine.
12	Created	SD	Professor changing the homework files on the fly during the sprints.

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	Can be demoed	Feature has been tagged as a release candidate	Feature and Sprint Release DoD is fulfilled
	Fully tested with the unit test	All merge conflicts have been resolved and all targeted branches were merged	Fulfilled requirements for putting the plugin on the Atlassian Marketplace
	Code well structured and formatted (hold to code conventions)	Integration of all features has been tested	Developer documentation is finished
	Clear explanation of code		User Guide is finished
	No syntax/runtime errors		Code is integrated with master branch
	Codes are peerly reviewed		
	Communicate issues by leaving comments on github
